

Dri-zone™ is an advanced performance fabric. Constructed from wickable yarn. Dri-zone™ works by rapidly transferring moisture away from the body. The excellent breathable qualities of Dri-zone™ ensures the wearer comfort & maximum results in any activity.

As well as its active-sports properties Dri-zone™ is designed for repeated washing & wearing. It is a truly robust, easy-care fabric, a fabric for optimum performance.

This anti-s snag icon confirms that the garment has been developed with anti-s snag properties. This 'snagging' is a problem which most knitted polyester fabrics are prone to.

**Anti-s snag rating**  
 3..... Medium  
 4..... Good  
 5..... Superior

This protection factor shows how well this fabric blocks out the harmful UV rays that are present in sunlight. Remember that this garment only protects the skin it covers. Protect other areas by wearing appropriate eyewear, hats or sunscreen.

This confirms the garment is of a high enough standard to be recommended for uniform use. Attributes include repeated washing and wearing, robustness and appearance over time.
